

DATA DISASTER IS A CRUEL REALITY COLO5 IS YOUR BEST PROTECTION

Colo5 is a leading independent data center operator offering secure and hardened colocation and disaster recovery services to customers nationwide. With over 140,000 square feet of dedicated facilities, Colo5 provides state-of-the-art security, redundant power systems, and a robust fiber network optimized for performance and speed to a host of demanding customers. Headquartered in Jacksonville, Florida, the company's core infrastructure can endure category 5 hurricane forces to ensure maximum reliability and peace of mind. Colo5's data centers are designed to accommodate the changing power density and cooling needs of the colocation market while maintaining consistently superior levels of customer service and support.

COLOCATION SOLUTIONS

Colo5's colocation services offers raised floor space on which you can select cabinet, cage, and suite configurations tailored to each customer's specific needs. This ensures the precise usage of space, power, and security features to match your exact network plans.

-)) Half cabinet
-)) Full cabinet
-)) Multiple contiguous cabinets
-)) Custom cages, available by the square foot

Colo5 has the best in space, security, and redundancy to give your business peace of mind.

DISASTER RECOVERY SOLUTIONS

Colo5 provides disaster recovery (DR) services that enable customers to safeguard their business and protect their data in a facility that can ensure minimal downtime. Reserving DR space within Colo5 allows for uninterrupted power usage and connection to its robust network infrastructure.

Colo5 DR space is equipped with carpeting, lighting, restroom and locker room facilities, kitchenettes, cubicle partitions or separate key access offices, air conditioning and heating, electrical outlets, and internet outlets. DR space is intended to be utilized during a disaster when the client cannot access their primary office space, but can be accessed 24/7/365 as a part of the contract.
